

# Inventory Management

**ADvalue is Avio-Diepen's proprietary inventory management solution, which will dramatically reduce inventory carrying cost and improve turn-around-time.**

## ADvalue Benefits:

### VMI Inventory

- Payment after consumption
- Improves your cash flow
- Allows for return of unused materials
- No obsolescence risk

### Improved Availability

- Instant availability of pre-defined parts
- Adapted to customer operations and BOMs
- Improved replenishment time

### Process Optimization

- Frees up internal resources for value added activities
- Increases Productivity
- Kitting in line with your manuals
- Real-time work order visibility

Invest in quality of your suppliers versus quantity

**First introduced in 2002 to support CFM56 and CF6 engine components maintenance shops, ADvalue is designed to take costs out of your supply chain.**

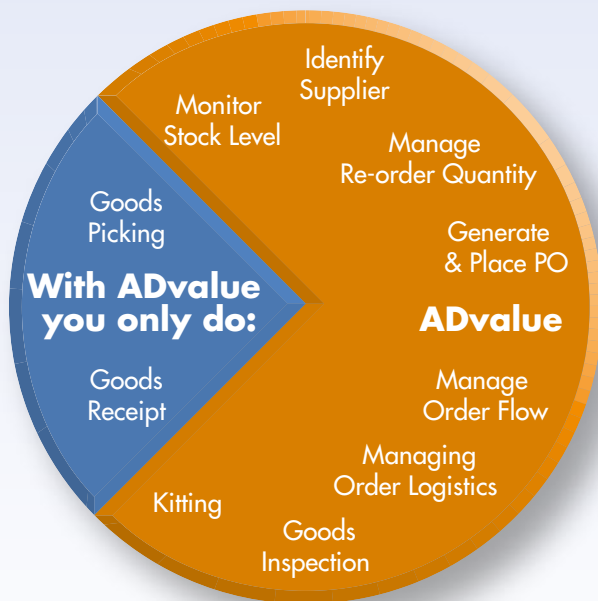

**ADvalue** combines the principles of Vendor Managed Inventory and Just-In-Time Delivery to bring down inventory carrying cost and materials handling time and shorten "time to invoice", it automates and streamlines routine administrative operations such as stock planning and monitoring, ordering, material handling, and invoicing. With **ADvalue** supporting your operations, you can do more with the same number of employees, thus allowing greater resources flexibility and reducing adverse effects of demand fluctuations on your business.

**ADvalue** complements your ERP system, not replaces it; **ADvalue** can also be complemented by customized kitting programs; The unused parts can consequently be returned to the bin – the flexibility of **ADvalue** allows high degree of customization to adapt to operational requirements of even the most demanding customers.

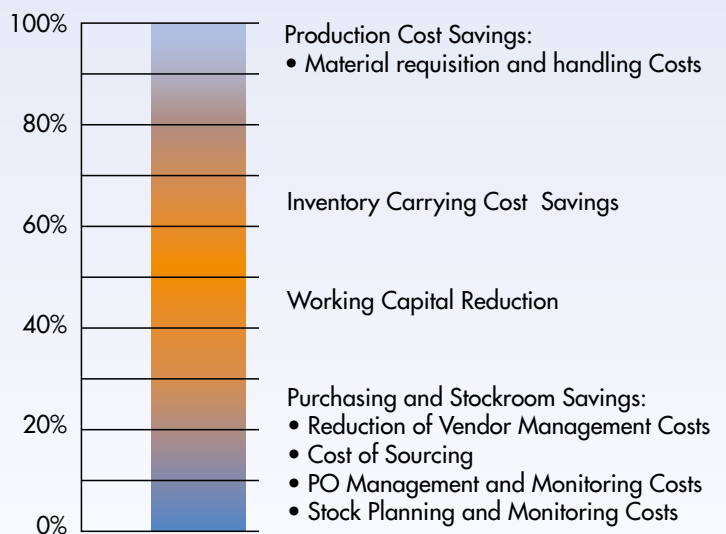

# Your extra pair of hands

ADvalue takes over routine administrative tasks

## Structure of Cost Savings with ADvalue

Our qualified team can provide you with a customized business case calculation.
